EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the original transmittal papers filed on 1/16/2001 for the instant application (see page 2 of the originally filed transmittal papers), applicants requested entry of an amendment concerning a priority claim to the parent application in the first sentence of the specification. The proposed amendment reads: "This is a division, of application Serial No. 09/243,335, filed February 1, 1999, which is herein incorporated by reference in its entirety." This proposed amendment was inadvertently never formally entered into the specification. For the purpose of printing the patent issued from the instant application, the examiner now formally adds an updated version of the amendment originally proposed by applicants at the time of filing.

The application has been amended as follows:

In the specification:

The following sentence has been added before the first sentence of the specification: --
This application is a division of application Serial No. 09/243,335, filed February 1, 1999, now U.S. Patent No. 6,197,580, which is herein incorporated by reference in its entirety.--

Conclusion

Claims 28-39 (now claims 1-12) are allowed.
